

Practical 2:

Semantic HTML5 Pages with Accessibility-Ready Structure Problem Definition Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, FAQ, and Feedback. Use semantic tags and accessibility-friendly structure.

Key Questions / Analysis / Interpretation

1. Are semantic tags such as header, nav, main, section, article, aside, and footer used properly?
2. Are form labels, headings, image alt text, and navigation links accessible?
3. Is the page structure consistent across all pages?

Key Skills to be Addressed

HTML5 semantic elements, accessibility basics, page linking, navigation menu, content hierarchy

Applications Static website foundations and accessible UI design

Learning Outcome Students will create clean, linked, and accessibility-ready HTML page structures.

Dataset/Test Data Sample page content for student portal

Tools/Technology to be Used : VS Code, HTML5, browser accessibility inspection tools

Total Hours Implementation: 4 hours | Total engagement: 6 hours

Post Laboratory Work

Description

Submit static page screenshots, source code, and accessibility checklist.

Evaluation Strategy Including Viva Semantic correctness, page linking, accessibility readiness, and code

readability.

Advanced/Intermediate Intermediate: Add breadcrumb navigation.

Extension Advanced: Add skip-to-content link and keyboard-friendly navigation.

Github Link: <https://github.com/MeetBhatti/WDF.git>

In this practical, the StudentHub Portal is developed using only HTML. The planned pages from Practical 1 are converted into actual webpages.

Semantic HTML elements are used to keep the webpage structure clear. The pages are also connected with navigation links and basic accessibility practices such as labels, headings and image alt text are used.

Mostly CSS and JavaScript are not used for designing or interaction in this practical.

In this practical we see about 10 webpages of Student Hub Portal which we discussed in practical 1 like as :

(1)Home / Main Page➔index.html

(2>Login➔login.html

(3)Assignment➔assignment.html

(4)Attendance➔attendance.html

(5)Contact➔contact.html

(6)Courses➔courses.html

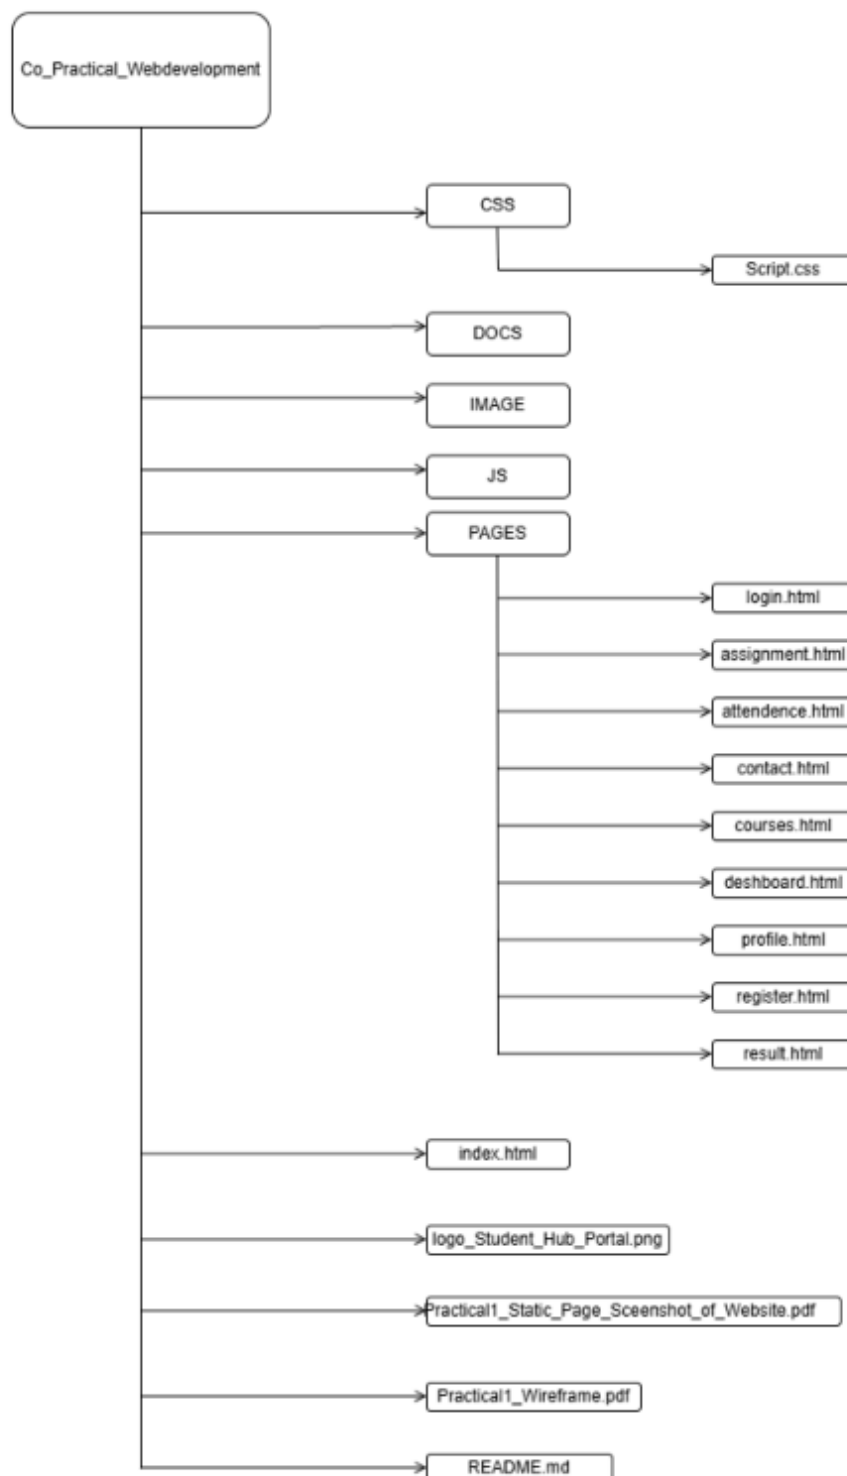

(7)Dashboard➔dashboard.html

(8)Profile➔profile.html

(9)Register➔register.html

(10)Result➔result.html

Structure:

Sitemap Of Student Hub Portal

Webpages and their Purpose:

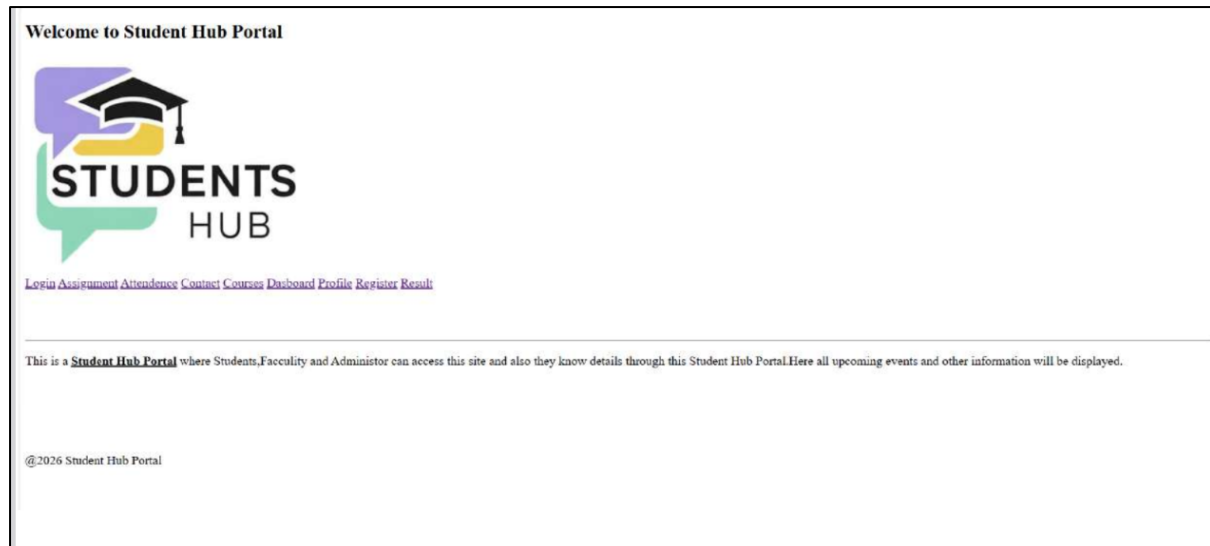

(1)Home Page:index.html

The Home Page is the main page of StudentHub. It contains the logo, welcome message and navigation links to other pages.

- <header>
-
- <nav>
- <a>
- <p>
- <footer>

[illegible]

Output

(2) Login Page – login.html

Purpose

The Login Page is used for user login.

Main HTML Used

- <form>
- <label>
- <input>
- <button>
- <h2>
- <p>

Code

```
<!DOCTYPE html>

Output

Assignment Page

This page is generally for assignment where Students can upload Assignments.

Here some are important Instructions about Assignments.

Instructinos:

Submit before the deadline.

Check the file before uploading.

Keep a copy of your assignment.

Contact faculty if you face any issue.

Assignment ID	Subject	Assignment Title	Faculty	Due Date	Status
A101	Web Development	Semantic HTML5 Pages	Prof. Patel	25 July 2026	Pending
A102	Java Programming	Methods and Classes	Prof. Shah	28 July 2026	Submitted
A103	Data Structures	Array Programs	Prof. Mehta	30 July 2026	Pending
A104	Computer Networks	Network Topologies	Prof. Joshi	02 August 2026	Submitted

Some Other Instructions are :

Upload only PDF or DOC files.

Maximum file size: 10 MB.

Late submissions may receive reduced marks.

Follow the prescribed format.

@2026 Student Hub Portal

Learning Outcome:

After completing this practical, I learned how to create structured HTML5 webpages, connect multiple pages, create forms and tables, and use basic semantic and accessibility-friendly HTML.
